Visa, a Technology Company

A look at the technology behind global money movement

Technology is at the core of what Visa is and does. As we continue to build on Visa's network of networks to be faster, more flexible, efficient and differentiated, our technology organization is instrumental in helping Visa stay ahead of the evolving payments landscape and setting the company up for future growth.

VisaNet, the company's core payment processing network, is central to Visa's vision of uplifting economies and individuals around the world.
